Overview

Our project aims to stylize image by implenting A Neural Algorithm of Artistic Style paper by Leon A.Gatys, Alexander S.Ecker and Mathias Bethge. https://arxiv.org/pdf/1508.06576.pdf

What is Neural Style Transfer?

- Neural Style Transfer is a technique used to generate image in the style of another image.
- It takes a content image, a style image, and returns the content image as if it were painted using the artistic style of image.

Key Finding

The representation of content and style in the Convolutional Neral Network are seperable.

Team - 38 NST 30 June 2020 4/9

Modules

- Keras (TensorFlow backend)
- NumPy
- SciPy
- Flutter

Team - 38 NST 30 June 2020 5/9

Status

- Read the research paper.
- Working on the code implementations.

Learnings and Difficulties

- Learned to work with github conveniently.
- Learned to make presentation using Beamer.
- Studied about CNN.

Team - 38 NST 30 June 2020 7/9

Difficulties

 The program is taking lot of time to output stylized image. (Working on it)

8/9
