#### Overview

Our project aims to stylize image by implementing A Neural Algorithm of Artistic Style paper by Leon A. Gatys, Alexander S. Ecker and Matthias Bethge.

## What is Neural Style Transfer?

- Neural Style Transfer is an optimization technique.
- Input:
  - Content image
  - Style reference image
- Output:
  - Stylized image: looks like the content image, but painted in the style of the style reference image

# Example

# Key Finding

The representations of content and style in the Convolutional Neural Network are seperable.

24 August 2020

#### Technical Stack

- Keras
- Tensorflow
- NumPy
- SciPy
- Matplotlib
- Flask

24 August 2020

6/11

#### Status and Statistics

• Project completed.

• Total number of commits: 206

• Total lines of code: 1122

Team - 38 NST 24 August 2020 7/11

### Learnings

- Version Control System.
- Presentation using Beamer.
- Convolutional Neural Networks.
- HTML, CSS and JavaScript.

8/11

#### Difficulties

- The program is taking lot of time to output stylized image.
- Allocating space for user's image.

#### **Future Extensions**

- Apply neural style transfer algorithm on videos
- Edit photos of different formats
- Photo editor- image enhancement, image manipulation, crop, rotate etc
